

# Marine Ecosystem and Living Resources in India

**Dr. G.V.M. Gupta**  
Scientist-F, CMLRE

## About the Speaker

Dr. Gupta has >21 years of research experience in Marine Biogeochemistry. He led many research projects on estuarine and lagoon ecosystems apart from coastal pollution. During the last decade, his research activity is mainly focused on Biogeochemistry and Ecosystem dynamics of the eastern Arabian Sea, in particular on oxygen dynamics. He has more than 40 peer-reviewed publications.

## About the Talk

The complex marine ecosystems harbour diversified wealth of living resources. The heterogeneity of physical and biogeochemical processes operating within Indian EEZ defines the habitat suitability of several biodiversity hotspots and major biogeographic provinces. This talk will explain these current understandings based on the exploratory surveys undertaken by CMLRE.
